IN THE CLAIMS

Please amend the claims as follows:

1. (Currently Amended) A method for depolymerizing starch comprising

_____mixing a starch material with an ionic liquid solvent comprising a cation and an anion to dissolve the starch, and then

_____treating the dissolved starch by agitating at a temperature and for a period for time to effect depolymerization of the starch into desired depolymerization products.

2. (Original) The method according to claim 1 wherein microwave irradiation is applied to assist in dissolution and depolymerization.

3. (Currently Amended) The method according to claim 1 ~~or 2~~ wherein pressure is applied to assist in dissolution and depolymerization.

4. (Currently Amended) The method according to ~~any of~~ claims 1 ~~to 3~~ wherein the depolymerization temperature is at least 70°C~~, preferably at least 80°C~~.

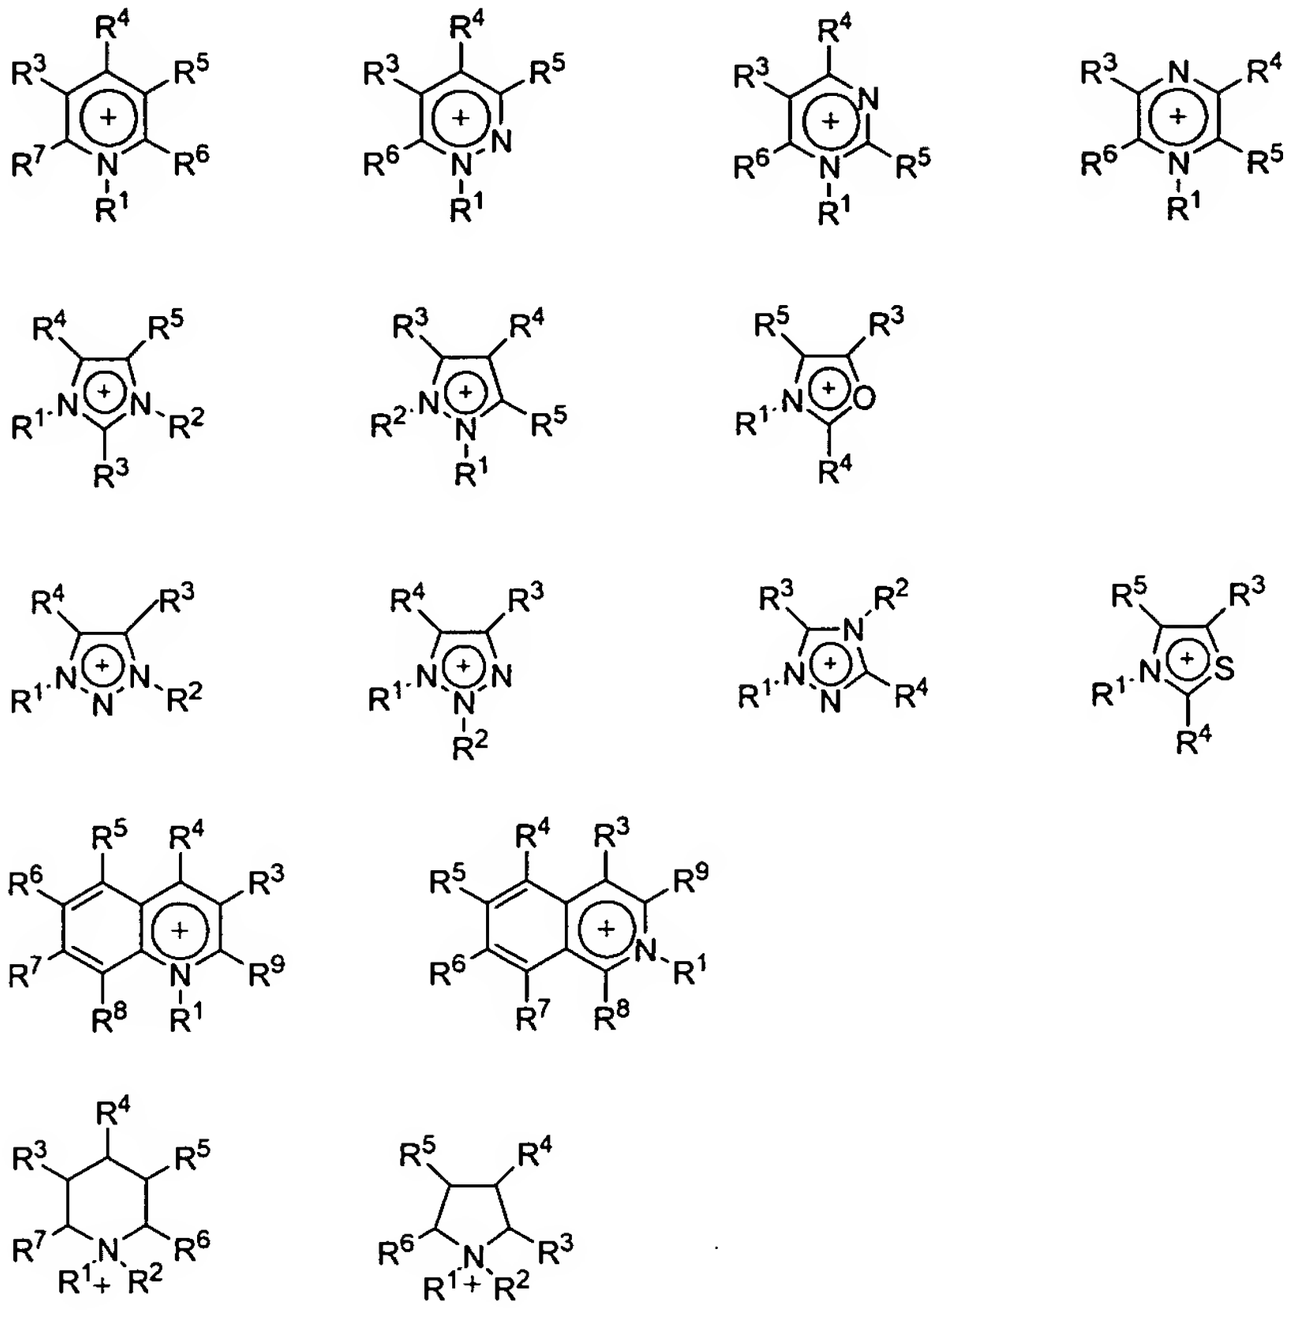
5. (Currently Amended) The method according to ~~any of~~ claims ~~1 to 4~~ wherein the depolymerization period is at least 5 minutes.

6. (Currently Amended) The method according to ~~any of~~ claims 1 ~~to 5~~ wherein the starch is depolymerized selectively such that the amylose of the starch is depolymerized into sugars and the amylopectin of the starch is retained essentially unchanged.

7. (Currently Amended) The method according to ~~any of~~ claims 1 ~~to 5~~ wherein the starch is depolymerized quantitatively such that both the amylose and the amylopectin of the starch are depolymerized into sugars.

8. (Original) The method according to claim 1 wherein the ionic liquid solvent is molten at a temperature of below 200°C.

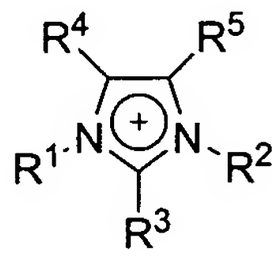
9. (Original) The method according to claim 1 wherein the cation of the ionic liquid solvent is selected from the group consisting of



wherein R^1 and R^2 are independently a C_1-C_6 alkyl or C_2-C_6 alkoxyalkyl group, and R^3, R^4, R^5, R^6, R^7, R^8 and R^9 are independently hydrogen, a C_1-C_6 alkyl, C_2-C_6 alkoxyalkyl or C_1-C_6 alkoxy group or halogen, and

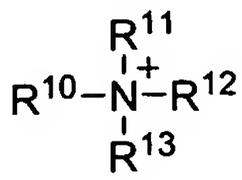
wherein the anion of the ionic liquid solvent is halogen, pseudohalogen, perchlorate or C_1-C_6 carboxylate.

10. (Currently Amended) The method according to claim 9 wherein said cation comprises



wherein R^3-R^5 are each hydrogen and R^1 and R^2 are the same or different and represent C_1-C_6 alkyl, and said anion is halogen~~, preferably chloride~~.

11. (Original) The method according to claim 1 wherein the cation of the ionic liquid solvent is



wherein R^{10}, R^{11}, R^{12} and R^{13} are independently a C_1-C_{30} alkyl, C_3-C_8 carbocyclic or C_3-C_8 heterocyclic group and the anion of the ionic liquid solvent is halogen, pseudohalogen, perchlorate, C_1-C_6 carboxylate or hydroxide.

12. (Currently Amended) The method according to claim 1, further comprising separating ~~wherein~~ the depolymerization products ~~are separated~~ from the solution by adding a non-solvent for the depolymerization products to precipitate the depolymerization products.

13. (Original) The method according to claim 12 wherein said non-solvent is an alcohol, a ketone, acetonitrile, dichloromethane, a polyglycol, an ether or water.

14. (Currently Amended) The method according to claim 1, further comprising separating ~~wherein~~ the depolymerization products from the solution ~~are separated~~ by extraction with a non-solvent for the ionic liquid solvent.

Please add new claims 15-17 as follows:

15. (New) The method according to claim 2 wherein pressure is applied to assist in dissolution and depolymerization.

16. (New) The method according to claim 1 wherein the depolymerization temperature is at least 80°C.

17. (New) The method according to claim 10 wherein said anion is chloride.
